

MICROBIOLOGY & BIOTECHNOLOGY

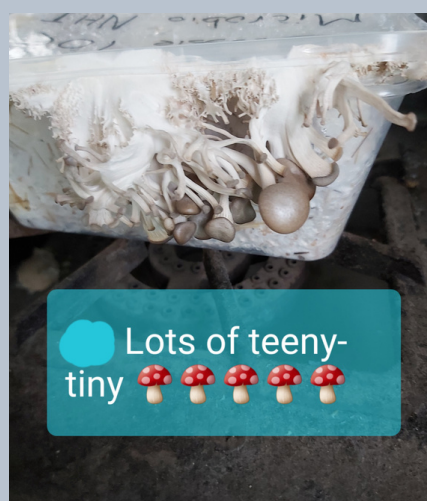

WHAT IS MICROBIO & BIOTECH?

Microbiology - study of microorganisms

- explore microbes, staining and streaking techniques

Biotechnology - use of cellular and bio-molecular components from organisms or other biological systems to develop and make products

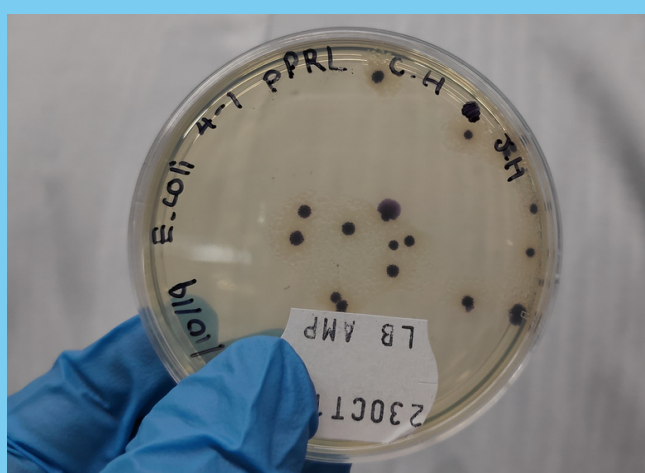

- explore DNA, genetics and real-life applications

MICROBIOLOGY PICS

BIOTECHNOLOGY PICS

2019 EXPERIENCE

"Both electives explore interesting content and feature really cool experiments that have allowed me to learn in interactive ways. I made many new friends in my elective classes while working on group projects and going out on exclusive excursions."- Cassie H. (2019 Microbiology and Biotechnology student)
